

ADVANCED COMPREHENSIVE
MEDICAL EXAMINATION SYSTEM

Oriental 4D Holistic

HARDWARE-SOFTWARE SYSTEM
FOR NON-LINEAR (NLS)
DIAGNOSTICS METATRON

It is a new generation of informational
medical diagnostic systems with
bio-feedback. Its operation is based
on a bioresonance method

DEVELOPER

VLADIMIR NESTEROV
President of International Academy
of non-linear diagnostic systems; full
member of Academy of medical and
technical sciences,
Academician; founder of the Institute
of Practical Psychophysics

PRESIDENT OF IPP (RUSSIA)
HEADQUARTERS (Doctor)

VERA NESTEROVA
President of IPP Japan Co., Ltd.
Hakujikai Memorial General Hospital,
Geriatrics Research Institute,
Visiting Researcher
Japan Mibyou Research Institute
International Supporting Member

CERTIFICATES

NEW 3D-MODELS

- 1 Chakras 
- 2 Meridians 
- 3 Skeleton 
- 4 Blood circulatory system 
- 5 Lymphatic system 
- 6 Heart 
- 7 Internal organs 
- 8 Brain 
- 9 Eye 
- 10 Ear

- CONTACTLESS • NON-INVASIVE • QUICK
- SAFE AND HIGH-INFORMATIVE METHOD OF AN ORGANISM EXAMINATION

ITS POSSIBILITIES:

- functional evaluation of an organism's functional state in a form of a topical NLS-analysis;
- monitoring of efficiency and results of various therapeutic treatment methods application;
- broad spectrum of research: from functional changes in patients organisms to a level of chromosomal aberrations;
- evaluation of adaptive capabilities of a human;
- identification of a primary nidus of a functional breach;
- evaluation of homeostasis main parameters;
- individual selection of the most efficient medicinal preparations (allopathy, phytopreparations, homeopathy, food supplements, lithotherapy);
- evaluation of stress adequacy during athletics (sportsmen trainings, fitness-centers);
- detection of active pathogenic flora, significant allergens;
- monitoring of rehabilitation process after various illnesses or surgical interventions;
- evaluation of an organism's predisposition to illnesses at a molecular genetic level;
- storing of patients evaluations results in a computer memory in order to monitor dynamics of functional state changes.

ADVANTAGES OF METATRON SYSTEM OVER OTHER DIAGNOSTICS METHODS:

- safety, i.e. maximal non-intervention into internal environment of an organism;
- quickness of a research — average time for a patient research is 15–20 minutes;
- mobility and portability;
- affordable price of device and therefore the research itself;
- high informativeness of the NLS-method, which is especially important for accurate diagnosing;
- high objectivity at information reading;
- diagnosing and monitoring of pathological conditions at early stages of a disease in the absence of significant organic changes of tissues;
- a possibility of active homeostasis control, which is impossible for any modern diagnostic system.

«SAKURA» — SOFTWARE OF A NEW GENERATION FOR JAPANESE MARKET

In addition to features of the previous versions, new software versions include a number of new 3D models in Full HD:

- | | |
|----------------------------|-----------------------------|
| - Internal organs | - Cardiac chambers |
| - Skeleton | - Cardiac vessels |
| - Muscles | - Cardiac conducting system |
| - Blood circulatory system | - Lungs |
| - Lymphatic system | - Teeth |
| - Nervous system | - External ear |
| - Heart | - Chakras |

Includes new etalons databases:

- | | |
|--------------------------------|--------------------------|
| - body types | - KAMPO phytotherapy |
| - KAMPO medicinal preparations | - Japanese food products |

PACKAGE OPTIONS OF HARDWARE-SOFTWARE SYSTEMS:

BASIC

MOBILE

STATIONARY
